PROFESSIONAL SUMMARY

- Python Developer & Machine Learning enthusiast focused on building data-driven applications and scalable backend solutions
 - Hands-on experience in data preprocessing, cleaning, exploratory data analysis (EDA), and data visualization using Python
 - Skilled in building, training, evaluating, and saving Machine Learning models using Scikit-learn and different ML algorithms
 - Experienced in backend development using FastAPI for building high-performance and asynchronous APIs
 - Proficient in working with PostgreSQL and MongoDB for structured and unstructured data management
 - Strong foundation in Data Structures & Algorithms (DSA), problem solving, and combining software engineering with Machine Learning
-

SKILLS

- Programming Languages: Python, SQL
 - Machine Learning: Supervised Learning, Unsupervised Learning, Model Training, Model Evaluation, Model Saving & Loading
 - ML Algorithms: Linear Regression, Logistic Regression, Decision Trees, Random Forest, K-Nearest Neighbors (KNN), Support Vector Machines (SVM), K-Means Clustering
 - Frameworks & Libraries: Scikit-learn, TensorFlow, PyTorch, FastAPI, Pandas, NumPy, Matplotlib, Seaborn
 - Tools: Microsoft Excel, Microsoft Word, Jupyter Notebook, Git, Google Colab, VS Code
 - Core Concepts: Data Structures & Algorithms (DSA), Problem Solving, Backend Development, Machine Learning
-

EDUCATION

- B. Tech. in Artificial Intelligence & Machine Learning (AI & ML) | Noida | CGPA: 8.1 | 2024 – 2028
 - XII (UP Board) | Jaunpur, U.P. | 81% | 2024
 - X (UP Board) | Jaunpur, U.P. | 82% | 2022
-

PROJECTS

COVID-19 Data Analysis :

- Analyzed global COVID-19 datasets using Python and Pandas to identify trends, patterns, and changes over time
- Cleaned, preprocessed, and transformed raw datasets for reliable analysis and accurate insights
- Performed Exploratory Data Analysis (EDA) and created visualizations of confirmed, death, and recovery trends using Matplotlib and Seaborn
- Applied time-series analysis to study COVID-19 growth patterns and data evolution

Machine Learning Model Development :

- Developed and trained Machine Learning models using Python and Scikit-learn for regression and classification problems
- Built a House Price Prediction model using regression algorithms to predict property prices based on input features
- Developed a Breast Cancer Classification model to classify diagnostic cases using Machine Learning algorithms
- Performed data cleaning, preprocessing, feature preparation, model training, evaluation, and performance analysis
- Saved and loaded trained models for deployment and future predictions using Python model persistence techniques
